Full Stack Developer

Objective:

A results-driven MERN Stack Developer with one year of hands-on experience in designing and developing scalable, high-performance web applications. Proficient in MongoDB, Express.js, React, and Node.js, delivering end-to-end solutions. Skilled in cybersecurity, including testing website security and implementing best practices to safeguard web applications. Adept at identifying vulnerabilities and strengthening overall system security. Committed to delivering clean, efficient code and improving web performance, while ensuring a seamless user experience.

Professional Experience:

MERN Stack Developer – Interware Software House

1. Building full-stack web apps using React, Node.js, and MongoDB.
2. Writing clean, responsive front-end code with Tailwind CSS.
3. Collaborating with the team on API integration and deployment.
4. Contributed to deployment and version control using Git, GitHub, and CI/CD pipelines.

Web Development Intern – enpio Software Solutions

1. Assisted in front-end development using React.js.
2. Learned backend basics with Node.js and MongoDB.
3. Contributed to UI improvements and bug fixing.

Education:

BS Computer Science | [University of Engineering and Technology, Lahore.](#)

(2020 – 2024)

Soft Skills:

- | | |
|-----------------------------|---------------------|
| ▪ Leadership | ▪ Analytical Skills |
| ▪ Problem-Solving | ▪ Time Management |
| ▪ Good Communication Skills | ▪ Teamwork |
-

Technical Skills:

Front-End

- HTML5
- CSS3
- TailwindCSS
- Chakra UI
- JavaScript
- React.js

Back-End

- Node.js
- Express.js
- Python
- PHP (Laravel)
- Next.js
- C++

Databases

- MongoDB
- MySql

Version control

- Git

Certification:

Cyber Security Course | [Corvit System – IT Training Institute, Lahore.](#) (6 months)

Mern Stack Course | [Corvit System – IT Training Institute, Lahore.](#) (6 months)

Final Year Project:

Tools: Technologies used are MERN Stack and Tailwind CSS.

DevLabs: An innovative learning platform for developers, created as part of a collaborative development team. It features problem posting similar to StackOverflow, rich text article sharing, comprehensive courses, an integrated online compiler, and a collaborative whiteboard. Additionally, DevLabs includes a CV builder and is geared towards expanding through industry partnerships and advanced coding tools, providing a dynamic environment for developers to learn, share, and grow.

Additional Projects:

- **E-Commerce:** Designed and developed a full-stack e-commerce web application featuring a real-time admin dashboard powered by Socket.IO, enabling dynamic product management, including adding and updating product descriptions, inventory, and user activity monitoring.
- **Instagram Clone:** Developed a full-stack Instagram clone using the MERN stack. The project features user authentication, post creation, liking, commenting, and profile management. The front end was styled using Tailwind CSS, ensuring a responsive and modern user interface.

- **Twitter Clone:** Created a Twitter clone using the MERN stack, incorporating user authentication, tweet creation, liking, retweeting, and following functionalities. The application was designed to focus on scalability and responsiveness, using Tailwind CSS for styling.
- **BlogMaster:** A dynamic blogging platform built using the MERN stack, enabling users to create and share blogs with images via a user-friendly text area. Users can tag blogs, search by title, engage through comments and likes, and report content for moderation, fostering a vibrant and interactive blogging community.
- **Notes-Taking Web App:** Developed a feature-rich notes-taking web application using React. Users can create, read, update, and delete notes with titles, tags, and markdowns.
